-----

ORDERING PROVIDER INFORMATION:

PROVIDER: Dr. Marcus Vance, MD NPI: 1982736450

ORGANIZATION: Texas Spine & Pain Specialists (Austin, TX)

-----

REQUESTED SERVICE & CLINICAL CODING:

PROCEDURE CODE (HCPCS/CPT): 64483

SERVICE DESCRIPTION: Transforaminal Epidural Steroid Injection, Lumbar

PRIMARY DIAGNOSIS (ICD-10): M54.16 - Radiculopathy, lumbar region

-----

CLINICAL DOCUMENTATION & HISTORY OF PRESENT ILLNESS:

Patient is a 64-year-old female presenting with severe right L5 lumbar radiculopathy persisting for >14 weeks with pain radiating into the right lateral leg and foot. Physical Examination: Positive straight leg raise at 40 degrees, 4/5 EHL weakness. Diagnostic Imaging: Lumbar MRI (2026-07-15) reveals right paracentral L4-L5 disc extrusion with clear compression of the exiting L5 nerve root.

Prior Conservative Treatments: Completed 10 weeks of formal physical therapy, and a trial of gabapentin with inadequate clinical relief.

Plan: Requesting lumbar transforaminal epidural steroid injection (64483) under fluoroscopic guidance.

-----

PHYSICIAN SIGNATURE: Electronically Signed by Dr. Marcus Vance, MD, MD
